

## Declaration on REACH Regulation

Gisors, the 14th December 2018

Dear Sir, Madam,

We, undersigned Meca-Inox company, ISO 9001 certified 2015 version and being manufacturer of ball valves, certify with documents from our vendors for items, they are conform to :

**« REACH » Regulation - Recording, evaluation, authorization and restriction of chemical substances (1907/2006) conform to update the 10/07/2017 (174 substances).**

According to REACH Regulation, Meca-Inox is an importer of substances and a user approval (producer of articles).

We are importer of substances alone or in mixtures from exterior of EU, we haven't any record to do because we don't import any substance  $\geq 1$  tonne / year.

As user downstream, we checked the pre-recording of our valves' substances with our vendors and anticipated a possible disappearance of our substances.

Following to answers from our vendors about REACH, we inform you that our valves do not contain more than 0,1% by weight of any substance extremely worrying like noted in the candidate list (see <http://echa.europa.eu/web/guest/candidate-list-table>).

We wish you a good receipt and thank you for your trust, please accept assurances of our highest consideration.

**FERRAND Lionel**

Quality Director
